

# BridgeScorer versions

There are several different version numbers that you need to keep track of:

## 1. BridgeScorer Control (BSC) program version

BSC is PC program controlling the BridgeScorers. You can find the version number written at the top of the BSC window and in the HELP/ABOUT dialog:

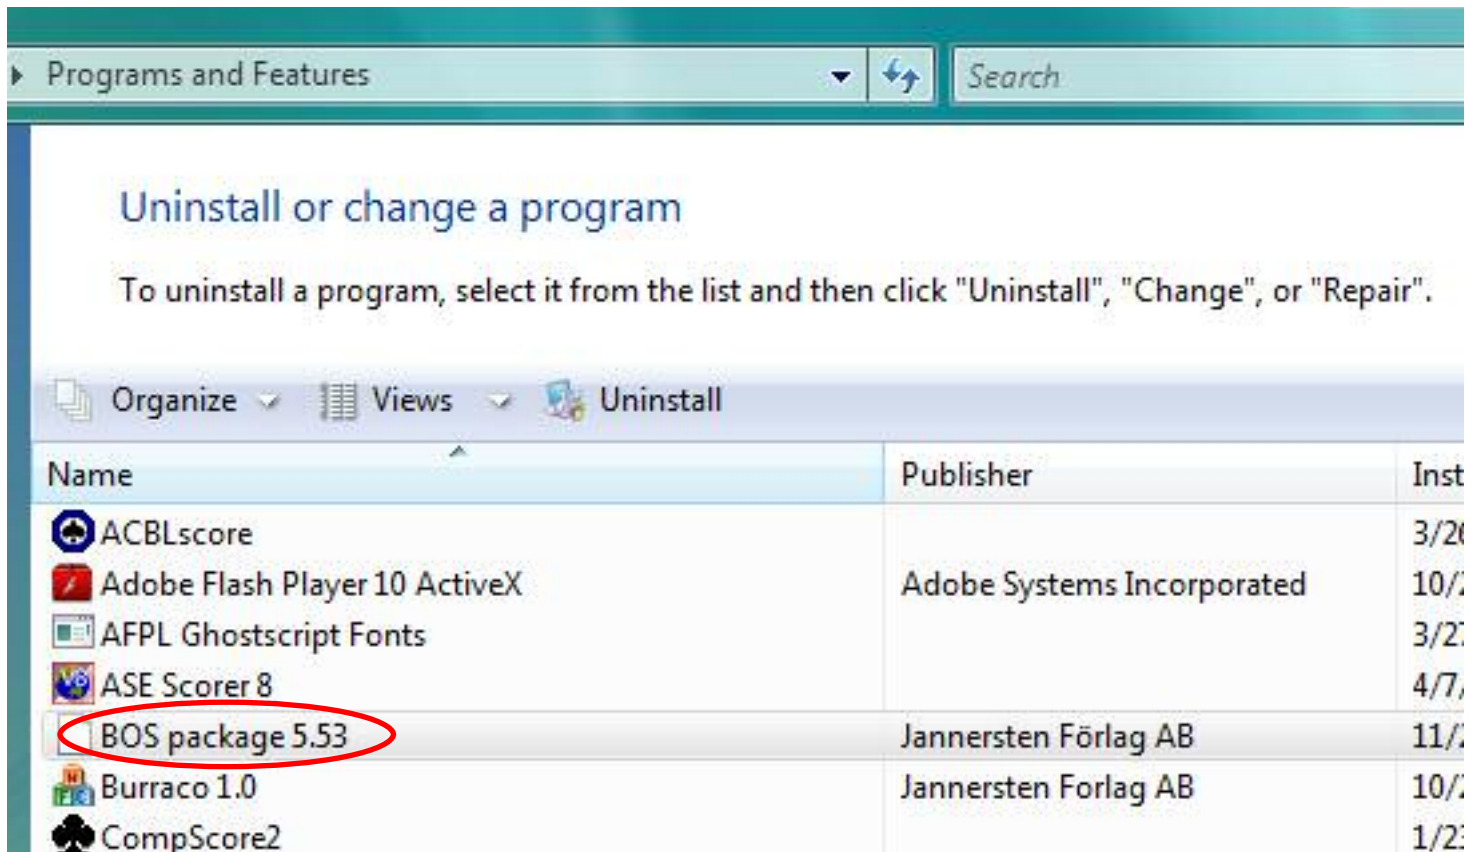

## 2. Tabletops (TBS) version

The version is displayed on the welcome screen

### 3. BOS package version

The BOS version is shown in the BOS About dialog and the BOS package version is shown in Windows Control Panel under Add/Remove programs.

The screenshot shows the Windows Control Panel window titled "Programs and Features". The main heading is "Uninstall or change a program". Below this, there is a sub-heading: "To uninstall a program, select it from the list and then click 'Uninstall', 'Change', or 'Repair'." The window has a ribbon with "Organize", "Views", and "Uninstall" options. A table lists installed programs with columns for Name, Publisher, and Inst. The "BOS package 5.53" entry is circled in red.

Name	Publisher	Inst
ACBLscore		3/20
Adobe Flash Player 10 ActiveX	Adobe Systems Incorporated	10/10
AFPL Ghostscript Fonts		3/20
ASE Scorer 8		4/7
<b>BOS package 5.53</b>	Jannersten Förlag AB	11/11
Burraco 1.0	Jannersten Forlag AB	10/10
CompScore2		1/20
